

Biological moderators

- **Breeding system**
lowest in monogamous

- **Migration**
lower in migratory

- **Coloniality**
higher in colonial

- **Cooperation**
lower in cooperative

- **Nest type**
varies

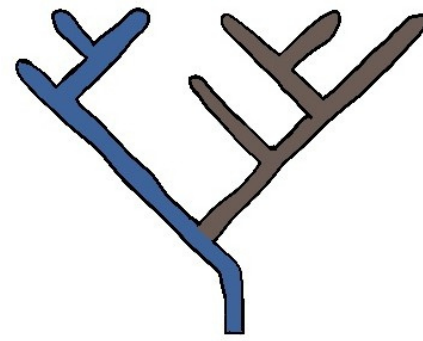

- **Body size**
lower in larger species

- **Clutch size**
higher with larger clutches

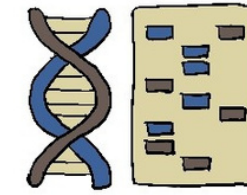

- **Latitude**
lower at high latitude

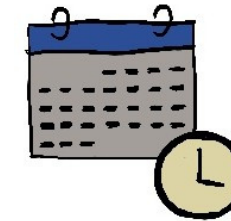

Phylogenetically structured variation

**Brood-level
mixed
paternity**

Methodological moderators

- **Marker type**
higher with
high-resolution
markers

- **Study duration**
higher in longer studies

- **Nesting context**
higher in nest-box studies

Multilevel partitioning of heterogeneity
